Contents

Page contents and mathematical concepts

Introduction	4
Sample numbers for flash cards	5, 6
Number recognition: practising in writing numerals < 10	7, 8, 9
Counting: counting objects up to 10	10
Counting: drawing shapes to match the given numbers	11
Counting: drawing shapes to match the words	12
Counting: matching numbers and their names	13
Counting: counting objects up to 20	14
Counting: matching and ordering numbers	15
Counting: recognising number names and ordering numbers	16
Counting: reading and recognising number names	17
Counting: writing numerals; counting up to 20	18
Counting: expressing numbers in their correct form	19
Number properties: matching numbers and their names	20
Number properties: matching numbers and their names	21
Number properties: ordering numbers (1)	22
Number properties: ordering numbers (2)	23
Number properties: number patterns; counting by two's and three's	24
Number properties: reading and ordering ordinal numbers	25
Counting: representing numbers using base 10 blocks	26
Counting: matching number names to amounts using base 10 blocks (1)	27
Counting: matching number names to amounts using base 10 blocks (2)	28
Counting: matching number names to amounts using base 10 blocks (3)	29
Counting: using base 10 blocks to represent tens and ones	30
Shape and Space: identifying 2D shapes	31
Shape and Space: identifying 3D shapes	32
Shape and Space: understanding lines of symmetry	33
Shape and Space: drawing symmetrical patterns	34
Shape and Space: properties of 2D shapes	35
Shape and Space: properties of 2D shapes	36

Mastering Maths: Number Recognition

Introduction

Mathematics should be part of every child's day - something to be enjoyed as they become confident of their skills and ability to solve mathematical problems and apply these problems to everyday life. The development of skills is particularly important as the child is introduced to the first formal mathematical concepts.

This book has been designed to provide young children with interesting and attractive activities to develop these early mathematical skills and knowledge. The pages encourage children to explore basic mathematical concepts, with a variety of well planned, easy to follow worksheets. They are structured so that children can develop an understanding of mathematical concepts through practice and repetition.

The activity sheets are preceded by some sample flash cards which can be constructed and placed around the room for easy reference by children. In addition, practice in the writing of numerals is provided in the form of practice sheets following the "look, trace and write" method of instruction.

The worksheets themselves are arranged sequentially to build on the children's prior knowledge, but can be used individually to support other material. They are an excellent means of introducing a concept as the graphics and artwork is both attractive and appealing to children. Each mathematical concept introduced has several activities which provides for reinforcement and revision of a concept, as well as remediation and evaluation.

zero

0

Name: _____

☐ Draw the right number of pictures to match the number.

1. ten apples
2. three circles
3. six people
4. one elephant
5. seven bees
6. two flowers
7. four cakes
8. eight pencils
9. five houses
10. nine fish

☐ What comes after these numbers?

one _____

two _____

five _____

four _____

seven _____

three _____

nine _____

six _____

Name: _____

☐ Match the numbers to their names.

Colour the matching apple and flower the same colour.
