

UNIT 6 ANSWERS: Check your punctuation

Day and Night

Our planet Earth travels around the sun. While it travels, Earth is spinning like a top all the time, but we can't feel it and we don't fall off.

Earth gets its light from the sun. At any time, half of planet Earth faces the sun and, for that half, it is day. The other side is facing away from the sun. That side is dark, so it is night.

Because Earth is spinning, the sun looks like it's moving across the sky during the day.

Self-assessment

My punctuation is:

☐

OK

☐

Improving

☐

Good

☐

Great
