Except as permitted under the Act (for example, any fair dealing for the purposes of study, research, criticism or review), no part of this book may be reproduced, stored in a retrieval system, communicated or transmitted in any form or by any means without prior written permission. All inquiries should be made to the publisher at the address above.

#### Copying of the blackline master pages

The purchasing educational institution and its staff are permitted to make copies of the pages marked as blackline master pages, beyond their rights under the Act, provided that:

1. The number of copies does not exceed the number reasonably required by the educational institution to satisfy its teaching purposes;
2. Copies are made only by reprographic means (photocopying), not by electronic/digital means, and not stored or transmitted;
3. Copies are not sold or lent;
4. Every copy made clearly shows the footnote (e.g. '(Macmillan Education Australia. This page may be photocopied for non-commercial classroom use)').

For those pages not marked as blackline master pages the normal copying limits in the Act, as described above, apply.

# TEACHING NONFICTION TEXT TYPES

This book contains essential lists, checklists, text models, writing frames and more to support you and your students as they explore, discover and write nonfiction text types. Dip in, take what you need, or adapt to fit your own individual writing classroom.

## EXPLORING NONFICTION TEXT TYPE MODELS

Before students write a chosen nonfiction text type, they need to understand its purpose, structure and language features. On pages 14 to 22 you'll find a **text model for each nonfiction text type**. These are 'pure' examples and have been written to contain all the main features suitable for ages 5-8. Photocopy the model in your chosen text type and give it to students. Have them read the model and then in small groups or as a whole class identify the features. They can record their findings on the **exploring text type worksheets** (pages 45 to 53). These worksheets can then be stored in students' writing folders for reference during independent writing time.

After the students have analysed the texts, you could annotate the text models and display them on the wall. The **summary tables** on pages 6 to 10 can be used as a ready reference to the structure and features of each text type.

## WORKING IN GROUPS

On pages 54 to 69 you'll find **writing frames for the basic text type structures** needed for ages 5-8. Use these during modelled writing lessons and for joint construction activities. Then have copies available in the classroom for students to use when they draft their own writing.

The **student checklists** on pages 35 to 43 are a quick and easy way for students to take control of their work. A blank line has been left on each one so you can add your own criteria if you wish. Have students check off the statements once they have drafted their writing. This will allow them to see if they have met the criteria for the text type or for the trait. They could then attach the checklists to their writing and refer to them in conferences, using the information when discussing revision ideas.

## ASSESSING NONFICTION WRITING WITH RUBRICS

Writing has always been difficult to assess in a measurable, positive, meaningful and objective way. Rubrics help solve the problem. Rubrics are lists of levelled criteria, skills, concepts or understandings related to a specific task or process. They offer specific measurable and observable criteria in a continuum. They act as developmental maps on which you can plot the progress of your students, or where students can plot their own progress. Rubrics establish clear expectations for students, and help them to direct themselves and set their own goals. Because there is an entry point for all students, all students can be successful.

On pages 24 to 32 you'll find a **rubric for each nonfiction text type**. Each one has space to add criteria for traits depending on your focus. Use these in conferences and to set goals for students' future learning. Separate columns are provided so that observed criteria can be ticked by the student for self-evaluation, or by the teacher. Future goals can be set and recorded on the line underneath the rubric. Because the rubric is structured as a continuum, students can see where they are headed and, with your help, select goals from that list of criteria.

A blank rubric has also been included on page 33, so you and your students can construct your own. Rubrics are even more powerful when students understand, own and control them.

# THE NINE NONFICTION TEXT TYPES OR STRUCTURES

Most writing in the real world combines several text types. A response text might contain descriptive elements as well as arguments to support a point of view. An information report might include a description and an explanation flow chart. However, separating out the 'pure' text types or individual structures and explicitly naming their features can help students gain a better understanding. They can then recognise the structures when they come across them in other texts, and use the structures in their own writing.

The **summary tables** below can be used as a guide to the content and structure of the pure text models on pages 14 to 22.

As your students explore and write text types, use the specific terminology listed here to name the structural and language features. You and your students will then have a common language and be able to talk to each other with clarity. Your students will also be familiar with the terminology when they come across it in the assessment rubrics.

## THE FIVE STAGES IN THE WRITING PROCESS

These stages reflect the process writers go through as they write any text type.

- 1 **Prewriting** involves discussing and brainstorming to gather thoughts and ideas about a topic, and to define the purpose and audience.
- 2 **Drafting** is the first attempt at writing. The writer gets their ideas down on paper and shapes them according to the chosen text type.
- 3 **Revising** involves fine-tuning. The writer improves their work. They might clarify ideas, check the organisation, consider voice, check word choice or review sentence fluency.
- 4 **Proofreading** is the mechanical stage. The writer double-checks conventions.
- 5 **Publishing** provides motivation for revising and proofreading. The writer shares their work.

Remember — the writing process is messy and not necessarily linear! Writers move in and out, backwards and forwards through the stages. They can have more than one piece of writing in progress at a time. And they do not take every piece of writing through every stage to the published form.

## THE SEVEN TRAITS OF GOOD WRITING

There is more to teaching writing than text types and process. Text types give students an overall structure for their writing. Process gives students a way to get the words on paper. But traits help them develop their writing. There are seven main components or traits of good writing: ideas, organisation, voice, word choice, sentence fluency, conventions and presentation — see page 12.

Thinking about traits can help students understand text types or structures. The form each trait takes will vary from text type to text type. The writing will be organised differently in a procedure than in an information report. And word choice will be quite different in a persuasion than in a description. On pages 70 to 80 you'll find **worksheets focusing on specific traits of good writing**. These can be used across the text types.

## FIRST PURPOSE, THEN PROCESS, THEN TRAITS

With text types, process *and* traits to consider, the writing classroom can feel overwhelming. But putting the three models together is easy. Encourage students to use the following simple steps:

- 1 First think, 'What is my purpose and audience?' This will give you the text type.
- 2 Next, decide what stage you are up to in the writing process.
- 3 Finally, look to the traits to support that stage and help use the text type effectively.

The following table is a guide only. Writers can think about any of the traits at any of the writing stages. However, certain traits do most logically fit with certain stages.

# Traits of Good Writing

## Ideas and details

### Building blocks

The meaning and development of the message is clear.

- ☉ Identify the purpose
- ☉ Decide what to say
- ☉ Focus on the main point
- ☉ Get rid of fluff
- ☉ Add important details

## Organisation

### The framework

The structure is coherent, with sequencing and idea development.

- ☉ Put things in order
- ☉ Write an introduction
- ☉ Write a conclusion
- ☉ Link ideas together in a way that matches the purpose (text type)

## Word choice

### The paint

Precise, rich or colourful words are used in a natural way to effectively convey the message.

- ☉ Find the right words
- ☉ Avoid 'tired' words
- ☉ Don't try to impress
- ☉ Use natural, everyday words well
- ☉ Match words to purpose and audience

## Voice

### The microphone

You can hear the author in the writing.

- ☉ Put yourself in your writing
- ☉ Like your topic and show it
- ☉ Think of your audience
- ☉ Match your voice to the purpose

## Conventions

### Good manners

Conventions are used to guide the reader. Punctuation, spelling, capitalisation, paragraph breaks, grammar and usage are all mechanically correct.

- ☉ Proofread
- ☉ Use tools such as a dictionary

## Fluency

### The music

The writing flows together. It is easy and enjoyable to read.

- ☉ Think about the sound of the words
- ☉ Read the writing aloud
- ☉ Create sentences that flow
- ☉ Vary sentence length
- ☉ Vary sentence beginnings

## Presentation

### Time to show off

The page looks good. It is welcoming. Margins, bullets, frames, illustrations, fonts/handwriting and so on are all appropriate

- ☉ Put everything in the right place
- ☉ Make it easy to read
- ☉ Share

Dear Diary,

My name is Gemma and I  
am seven years old.

I have black hair. It is short and a little wavy.

My eyes are brown.

I wear glasses to read, but not to play.

When I smile, you can see that I have lost my  
two front teeth.

Nobody looks exactly like me . . . except my  
identical twin!

I love  
pulling  
faces.

Pulling faces  
exercises my face  
muscles because you  
need to use over  
40 muscles to  
frown.

I  
don't  
think we should  
frown. I think we  
should smile. It only  
takes 17 muscles to  
smile. Let's give our  
muscles a rest.

## How Does Your Body Get Fuel?

Cars fill up at the petrol station. Your body gets fuel from food and drink.

- 1 You take a bite and chew the food into small pieces.

### Digestion

- 2 After you swallow, the pieces of food slide down a tube (the oesophagus) into your stomach.

- 3 In your stomach, the food is squeezed and squashed into a sort of soup.

- 4 Then the soup travels through another long tube (the intestines). As the food travels, your body absorbs what it needs.

The leftovers your body can't use are pushed along until they come out of your bottom when you use the toilet.

I believe children should turn off the television or computer and play active games instead.

Your body is designed to move. It needs exercise to keep it strong and healthy.

2

If your body is not strong, you might get sick or your bones might break.

3

Watching television and using a computer are sit-down activities. The more time you spend doing them, the less time you have left to be active.

4

So you should make a healthy move. Turn off the screen and get active!

# Bones

Feel your elbow. Can you feel something hard under the skin? That's a bone.

You have 206 bones inside your body. They all fit together to make your skeleton.

Your skeleton holds your body up. If you didn't have a skeleton, you wouldn't be able to stand up.

Your skeleton also protects soft and important parts of your body like your heart and lungs. If you didn't have a skeleton, you would have to wear armour to play!

How many bones can you feel?

# How to Clean Your Teeth

## What you need

toothbrush

toothpaste

cup of water

## What to do

- 1 Squeeze a bit of toothpaste about the size of a pea onto the toothbrush.
- 2 Wet the toothbrush under the tap.
- 3 Gently brush one small group of teeth at a time. Move the brush in small circles. Brush the outside of the teeth, the inside of the teeth, the chewing surfaces, and in between the teeth.
- 4 Repeat on another small group of teeth. Keep going until all your teeth have been brushed.
- 5 Gently brush your tongue.
- 6 Take a sip from the cup of water. Swish the water around your mouth and spit out.

Brush twice a day for two minutes. It will help if you play a favourite song while you brush!

Friday, 13th May

Dear Nan,

Last Monday I was playing on the monkey bars with my friend Zac. I did two-zee's. That's when you grab every second bar. Then I was hanging by my feet. It was fun.

Then the bell rang and I got a fright. I slipped. I landed with a crash right on my left arm. I was screaming. It hurt.

Zac ran to the office to get help. I'm glad he was there.

An ambulance came and took me to the hospital. At the hospital they x-rayed my arm. It was broken.

The doctor put a plaster cast on it. She said the plaster will stop my arm from moving while new bone grows to fill in the break.

Everyone at school has signed my cast, but I can't wait to get it off. It's hard swinging on the monkey bars with just one arm!

Lots of love from,

Kitty

## Our Healthy Canteen

Have you heard about the canteen's new menu?

It's all healthy.

The canteen now sells fresh fruit and vegetables instead of loaves. There is something different each day. Yesterday the canteen had apples, melon balls, fruit salad and carrot or celery sticks. I tried a cup of fresh fruit salad. It was delicious.

I give our healthy new canteen the thumbs up!

You should try it too.

# Hear My Voice

- 1 Work with a partner.
- 2 Take turns to spend five minutes talking about the topic you are writing about. Talk about what you find interesting or surprising. Your partner will listen and can ask questions.
- 3 When your turn to speak ends, write down as many of the words you used as you can. Ask your partner to help you remember them. Did you say something that you really liked? Write it down.

# Tired Words

Re-read your draft writing. Are there any tired words? Write one tired word in each circle. Now think of as many new words as you can that are more active or interesting. Write these words in the boxes.

Choose one new word to replace each tired word.  
How do these new words change your writing?

**Note to teacher:** Adapt the sheet by asking students to look for specific types of words to suit the text type you are studying, for example verbs in an explanation text or adjectives in a description.

**Text Type:** Any **Trait:** Word choice

# Stretchy Sentences

Interesting writing has a mix of long sentences and short sentences.

Draw boxes around the sentences in your draft writing.

Title of draft: \_\_\_\_\_

Are the boxes different sizes? ☐ yes ☐ no

Do the boxes make an interesting pattern? ☒ yes ☐ no

If you ticked a 'no' box, you need to revise for fluency.

Try stretching some sentences.

Start with a short sentence from your draft. Write it on the first line. For each new line, add or change one word to make the sentence more interesting. Which version do you like best?

**Note to teacher:** Don't limit postcard presentations to just recount texts. Postcards work really well for other text types too, for example information reports (try animals) or response texts (try places or events). Even procedures could work (try directions to a place). Bind the postcards into class books.

**Text Type:** Any **Trait:** Presentation

# How to Make an Origami Book

Here is one way to present your final work: publish it in a tiny book. This origami book does not need any staples or glue.

1 Fold a piece of paper into 8 sections and open it out again.

2 Fold the left edge to the right edge. Cut along the solid line.

3 Open the paper and fold the top edge to the bottom edge.

4 Push in the ends to make a cross. Flatten the book.

Now decorate the cover and publish your writing on the pages.
