Teachers' Notes

SPELL IT RIGHT! 3 is a bright, simple set of activities based on the idea that words cluster together around meaning groups or themes. When we talk about a subject, for example weather, it is likely that we will use words that are related to the weather theme. The activity pages in the book contain a range of tasks that vary from page to page, but essentially contain the list and a mixture of the following tasks:

1. THE LIST

All activity pages start with a list of spelling words. The first question suggests that students put list words into a context. They do this by using the words in sentences, by rewriting the list in alphabetical order, or by building new words based on those in the list. In some instances this activity may need explaining, but it makes sure that students examine meanings before getting caught up in learning the word. A template, that can be photocopied onto the back of worksheets to provide guidelines for children, is provided on the last page of this book.

2. WORD WORK

The 'Word Work' section looks at words, their origins and their usage. It often focuses on meanings and research skills.

3. WORD PUZZLES

This section looks at word games and word plays which are fun but challenging. The activities should help to widen vocabularies and to introduce students to some classic word tricks.

4. FIND OUT

These are research activities involving written and oral research methods.

5. YOUR WORK

'Your Work' seeks to challenge the students to examine themselves and the subject involved. The questions are fairly personal and may require some research at times.

GENERAL

The themes in **SPELL IT RIGHT! 3** are general and can be worked in well with many curriculum areas. **SPELL IT RIGHT! 3** seeks to provide high interest and student involvement by teaching spelling skills in a stimulating way. The activities are fun, but have an underlying language core. They are seen as being ideal for both class use or as homework exercises.
